

ROTARY DEVICE

RSD-60

- Mounts vertically or horizontally on the Vertex and Excel machine models.
- Allows for parts rotation to a position relative to a coordinate system or current position.
- Commonly used for measurement of medical and dental parts, bits, cutters, valves, fittings, and multi-sided parts.
- InSpec software integrates the rotary seamlessly and offers an intuitive on-screen interface.

Technical Specifications

External Dimensions [mm]	95 x 150 x 80
Centerline Height [mm]	60
Maximum Speed [°/second]	120
Resolution [arc seconds]	1.3
Accuracy [arc seconds]	± 15
On Axis Capacity [Nm]	1.5
Chuck Thread	M14 x 1.0
Weight [kg]	1.5

RSD-60 Kit Contents

- Rotary Device
- Faceplate with Hardened Finish (Ti-Al-N)
- Three-Jaw Chuck with Faceplate Adapter
- Calibration Artifact and 45° Mirror Assembly
- Stage Mounting Bracket
- Vertical Mounting Bracket
